

EAGLE REGISTRY

WELCOME

This is the **fourth EAGLE Newsletter**. With this, we hope to keep you updated on progression of the registry, any planned EAGLE events and important messages.

STUDY STATUS

The first milestone of **50 INCLUSIONS** has been reached! This hopefully marks the beginning of a very successful 2014 and we get closer to our goal of **250 EAGLE** patients.

We would like to thank all participants for their efforts. A special thanks to the new participants, **dr. Jiang** from Roermond, **prof. dr. Böckler** from Heidelberg, **dr. Saucy** from Lausanne and **prof. dr. Speziale** from Rome, who already started enrollment.

To keep you updated we will send you a short study status every two months.

PATIENT ENROLLMENT

In some cases sending the CTAs takes quite a while via post. We updated the online enrollment form for easy, quick and safe CTA sharing. A link directing you to the EAGLE **inteleGRID page** has been added. If you click on the link at the bottom of the form, a new page will open where you can **upload your CTA**. We will access your scan and forward it for CORE-lab review. Do not forget to click **submit** to send us the enrollment form.

If you have any questions about using inteleGRID, please contact us.

REMINDERS AND CLARIFICATIONS

After entering the data you provided we noticed that there is some confusion regarding the **Index CRF** question: "*The most proximal end of the stent graft was placed:*". We consider the **bare metal struts** as the **most proximal end** of the stent graft, instead of the beginning of the fabric at the proximal markers.

Follow-up:

You will start seeing more EAGLE patients in your follow-up program. Please make sure to complete all the appropriate CRFs. Also let patients fill out a **Quality of Life** form at every scheduled follow-up moment. In case of an adverse event, please complete an **Adverse Event** form and include a short narrative.

If you have any questions regarding follow-up or adverse events, **do not hesitate** to contact us.
