

EAGLE REGISTRY

WELCOME

This is the **fifth EAGLE Newsletter**. With this, we hope to keep you updated on progression of the registry, any planned EAGLE events and important messages.

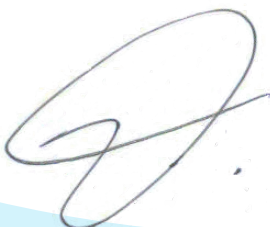

DEAR COLLEAGUE

I sincerely would like to thank you for your contribution to the **EAGLE endeavor**. Our team is **very proud** that we all created a doctor-initiated registry of this scale; only possible with the continuing help of **enthusiastic participants**.

I also would like to thank you for all the **support our PhD candidates** Rutger, Pieter and Yannick experienced on their visits to your center. It's a great experience for them to work on a **PhD thesis** with internationally **renowned** vascular centers.

We are closing in on the **100 inclusions milestone**, which can be reached by the **end of the year!** We are convinced we can achieve our goals when we **continue our pleasant collaboration** with the doctors and research nurses in all participating centers.

Wishing you all a good summer, also on behalf of **Philippe Cuypers** and **Marc van Sambeek**

Joep Teijink

STUDY STATUS

We experienced an excellent **April** and **May** for the EAGLE Registry. Currently we have **75 EAGLEs**. The rationale and design **has been published** in the May issue of the Journal of Cardiovascular Surgery. We hope to continue this positive trend during the summer.

REMINDERS AND CLARIFICATIONS

Please don't forget to collect the **EQ-5D** at admission, **discharge** and at every follow-up moment.

Fluoroscopy duration and contrast volumes are not always recorded in the hospital computer. We therefore advise to take the **Index CRF** with you into the OR and fill out the information there.

PATIENT ENROLLMENT

You can **digitally** send the CTA when you need **CORE-Lab confirmation** quickly! Please contact us for the possibilities.

STUDY CONTACTS

Pieter Broos, Study Coordinator
Yannick 't Mannetje, Study Coordinator
