

EAGLE REGISTRY

WELCOME

This is the **sixth EAGLE Newsletter**. With this, we hope to keep you updated on progression of the registry, any planned EAGLE events and important messages.

STUDY STATUS

Beyond our expectations, the number of inclusions gradually increased over the summer. We currently included a total of **80 EAGLE** patients.

We believe that we can reach 100 inclusions **before the end of 2014**. On the next page you will find the most recent study status for all centers.

In the August edition of the Journal of Vascular Surgery **prof. Matsagkas** published promising results on the use of the Endurant stent graft in **short (<10mm) infrarenal necks**. We read this article with great interest and would like to thank him for stressing the importance of studies like the EAGLE Registry.

Our own manuscript, the *Rationale and design of the EAGLE Registry* will be printed in the **October issue** of The Journal of Cardiovascular Surgery.

PATIENT ENROLLMENT

Most centers have already included at least one patient and are familiar with the process. We would like to ask you to complete **the patient enrollment form** on the website for every possible patient. The in- and exclusion criteria are mentioned to assist you in patient enrollment.

If you have any further questions about the enrollment procedure, or doubts regarding the EAGLE criteria, please contact us. You can always send us a **CTA for review**.

REMINDERS AND CLARIFICATIONS

In august we contacted all centers with regards to the first payments. We will start **this month** with the payment for the 1-year follow-up data.

Our telephone number changed. We can now be directly reached at **+31 40 239 6350**, you can also still reach us on the old number. If you have any questions, please don't hesitate to contact us.

PATIENT ENROLLMENT

Please **send the CTA to**:
EAGLE Registry
Department of Vascular Surgery
Catharina Hospital
P.O. Box 1350, 5602 ZA Eindhoven
The Netherlands
