

EAGLE REGISTRY

WELCOME

This is the **ninth EAGLE Newsletter**. With this, we hope to keep you updated on progression of the registry, any planned EAGLE events and important messages.

STUDY STATUS

The EAGLE Registry has currently included **110 patients**. We are happy with the steady inclusion rate, although it is not high enough. Our current goal is to include a minimum of **150 patients**. Therefore, the EAGLE coordinating team has decided to extend the inclusion period to **April 2016**. We believe the extra months will provide us with more data to **strengthen the registry**.

PATIENT ENROLLMENT

When you plan to implant an Endurant stent graft and have doubts about EAGLE eligibility, **contact us!** We believe some patients are treated outside IFU without the operator being aware of it. It would be unfortunate if these **valuable patients** are not included in the EAGLE Registry. We are happy to measure all CT-scans and send a full report.

The fastest way to send us a CT scan, and receive a report, is via dedicated software of **Intelegrid**. A link to the *Intelegrid* page can be found at the bottom of the **Enrollment form**. It is a safe secure website and data can be send anonymized. If you need assistance please contact us.

REMINDERS AND CLARIFICATIONS

The payment for the data you have gathered has changed because various centers are not allowed to receive compensation without an invoice. Therefore, we will be sending a notification for an **invoice** for the 1-year data.

Please make sure you provided us with all the available data.

PUBLICATION

Recently Broos et. al published an article in the **Journal of Vascular Surgery** about the performance of the Endurant stent graft in challenging anatomy. The results from the **ENGAGE registry** are promising for the EAGLE Registry.

Pieter Broos will be present at the **ESVS annual meeting** in Porto, Portugal. He will be presenting a poster. We hope to see you there!

prof. dr. Joep **Teijink**
dr. Marc van **Sambeek**
dr. Philippe **Cuypers**
