

EAGLE REGISTRY

WELCOME

This is the **tenth EAGLE Newsletter**. With this, we hope to keep you updated on progression of the registry, any planned EAGLE events and important messages.

STUDY STATUS

In the previous newsletter we addressed the fact that we will continue the inclusions until we reach 150 EAGLE patients. Currently, **123 patients** have been included. We hope, with combined efforts, we can **rapidly achieve our goal** and merge our data with the challenging cases from ENGAGE.

EAGLE FACTS

Our youngest EAGLE patient is **53 years** while the oldest is **92 years** old. A relatively high percentage, 15.7% of patients, is female. EVAR was performed for a symptomatic AAA in 13.7% of the cases.

An **infrarenal neck** of 58mm is the longest we included, while the shortest was just 5mm. The **most extreme** infrarenal angulation with 89 degrees is close to a right angle. We are less liberal with regards to the suprarenal angle but with 74 degrees it is anything but straight.

While the mean **AAA diameter** is 63mm the biggest is almost twice as large with **114mm**. And although we focus on the infrarenal neck, the iliac arteries are often challenging. A **common iliac artery of 90mm** is included in the EAGLE Registry as well.

These facts indicate the diversity of a **challenging AAA population**

INCLUDING PATIENTS

Make sure you keep **including patients** so we can analyze the outcomes of this interesting population as soon as possible. A patient can

be enrolled **up to the day of treatment**. Just give the coordinating center a call or send us an e-mail. This also applies to **symptomatic AAAs**.

A CT-scan can be send through **INTELEGRID** or by mail and we will provide a CORE-lab report within days. If you have doubts about inclusion, feel free to **share the CT-scan** with us.

REMINDERS AND CLARIFICATIONS

All including investigators will be named as part of the **EAGLE Registry collaborative** in future publications. Furthermore, the coordinating team will ask **major, and pro-active**, including investigators to **co-author** publications.

On behalf of

prof. dr. Joep **Teijink**
